Some Random Landscape Thoughts

Joshua Mitchell

You lead a full busy life, and your yard should be a sanctuary where you rest after a hard day of work. To achieve this goal, you will have to make smart choices to reduce your many landscape maintenance responsibilities. Less work in your yard means more time for enjoying it.

Creating an inviting outdoor space doesn't have to be a time-consuming backbreaking endeavor. Although there is no such thing as a truly zero-maintenance landscape, it is possible to create a stylish backyard with minimal upkeep.

The key to low-maintenance landscaping is simplicity. Consider working with the natural beauty of the land and incorporating elements which highlight those areas.

There are plenty of low-maintenance solutions for your yard. With the resulting time savings, you will have more time to use your yard as it was intended (for your enjoyment).

Included on the next page, are some easy ways to spruce up your backyard and make your outdoor space the envy of the neighborhood with your easy to care for landscape.

Simplify Your Lawn Care Maintenance

Hardscaping

Hardscaping is the use of pavers, concrete, brick, or decorative stone.

Installing hardscaping can be costly, but it will save you time and energy when maintaining your lawn.

Artificial Grass

Consider purchasing artificial grass if you don't have time to mow your lawn.

Artificial grass requires very minimal care as all you need to do is hose it off from time to time.

Perennials

Perennials are the gift that keeps on giving, season after season.

If you want to add a color to your landscape, try looking for low-maintenance perennials.

Evergreens

Evergreens help your home look beautiful during all the seasons.

While other plants may lose their foliage after summer, evergreens maintain their leaves throughout the year.

Irrigation System

An irrigation system can control the watering by season and zones.

If you don't have underground sprinklers, you can purchase a timer that attaches to your hose bib.

Rocks

River rocks and pea gravel can be used to replace mulch and wood chips.

This option requires far less maintenance, plus they add a clean and sleek look to any landscape.
